Cytometry Specialist position open at Centro Cardiologico Monzino IRCCS, Milan, Italy

Dear All,

We have an immediate opening for a **Cytometry Specialist** in the Research Flow Cytometry Core at Centro Cardiologico Monzino IRCCS, Milan, Italy. If you have a drive to be a part of a team, thirsty for knowledge, and a heart for service please consider this position that requires the candidate to already have a command in the area of flow cytometry, large panel design, troubleshooting instruments and data, training flow cytometry, etc. and should contribute to our team and our goals in a short timeline upon arriving at Centro Cardiologico Monzino.

We do also have available a **more junior position** (operator) if you don't feel that you qualify for the specialist position.

Flow cytometry is used at Centro Cardiologico Monzino both for basic science as well as for clinical studies with cytometers from most vendors.

If you, or anyone you know, has interest in working at Centro Cardiologico Monzino, a highly specialized research and care institute focusing on the heart and its vessels, please forward a letter of interest along with your CV to **direzione.scientifica@cardiologicomonzino.it**.
